

BLM GROUP

PRESS RELEASE

INNOVA

Vision. Technology. Solution.

At its headquarters in Levico Terme (TN), BLM GROUP is offering its customers a new edition of its Open House. The group, globally recognized as a market leader in the production of tube and sheet metal processing machines, is opening the plant doors for two weeks (September 20 to October 4) to welcome its customers. The new name of our Open House is INNOVA, selected to purposely place a strong focus on the company's unwavering devotion to technological innovation.

This year's theme is "Vision. Technology. Solution." These three concepts represent the technological development path that BLM GROUP lives every day. By virtue of this event, we propose to all of our customers: vision for the future, insightful technological development and solutions targeted to their needs.

The event occupies a total exhibition area of more than 10,000 square meters divided into 4 main Tech Hubs, where attendees will have the opportunity to get hands-on with the latest innovations on the group's various technologies (Lasertube, sheet laser, 3D laser cutting cells, tube benders, wire benders, sawing machines and tube shapers) and all the software solutions of the BLMelements suite. At INNOVA, attendees will also find specific areas dedicated to research and development and the wide range of services offered by the group: maintenance, technical assistance, training and BLMportal.

During INNOVA, guests will also have the opportunity to interact with industry experts, who will guide them through the exhibition spaces and assist them with the "leitmotif" of this Open House: from the vision of new goals, through the knowledge of new technological tools, to identifying the most suitable solution for their needs.
