

Officially opened new Towcester headquarters

Three-day open house brought together customers, partners and industry professionals to celebrate the new facility dedicated to technology, training and support for the UK market

BLM GROUP has officially inaugurated its new headquarters in Towcester, Northamptonshire, reaffirming its commitment to strengthening its presence in the UK and providing customers with an even higher level of support.

Held from 6 to 8 October, the three-day event welcomed customers, partners and industry professionals, offering them the opportunity to tour the new facility, experience the Group's technologies first-hand and explore the opportunities offered by advanced solutions for modern manufacturing.

Visitors were able to discover BLM GROUP's comprehensive technology portfolio, including Lasertube systems, tube benders, 3D cells and laser systems for sheet metal processing. The new premises also feature dedicated training areas, providing customers and partners with opportunities to enhance their technical expertise.

"The inauguration of our new headquarters was an important opportunity to celebrate what BLM GROUP has built in the UK while also looking ahead to the future," comments Jon Curtis, Managing Director of BLM GROUP UK Ltd. "We were delighted to welcome customers and partners to a facility designed to encourage dialogue, showcase our technologies and share insights into the evolving needs of the market. This new environment will enable us to work even more closely with our customers and provide not only individual technologies, but integrated solutions, in line with our '*Many technologies, one partner*' claim".

The open house marked a further milestone in BLM GROUP's development in the UK, where the company has been operating since 1997 and has established strong, long-standing relationships across the local industrial community.

"The strong participation and interest shown throughout the event confirmed the value of maintaining close, direct relationships with our customers and partners," concludes Jon. "We are proud of what we have achieved over almost thirty years in the UK and look forward to the new opportunities that our Towcester facility will help us pursue".
